PURE ENERGY FOR BETTER TOMORROW

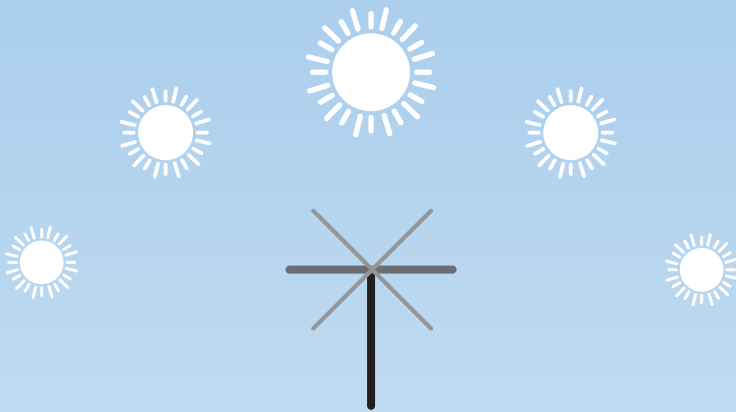

WWW.BENUPOWER.COM

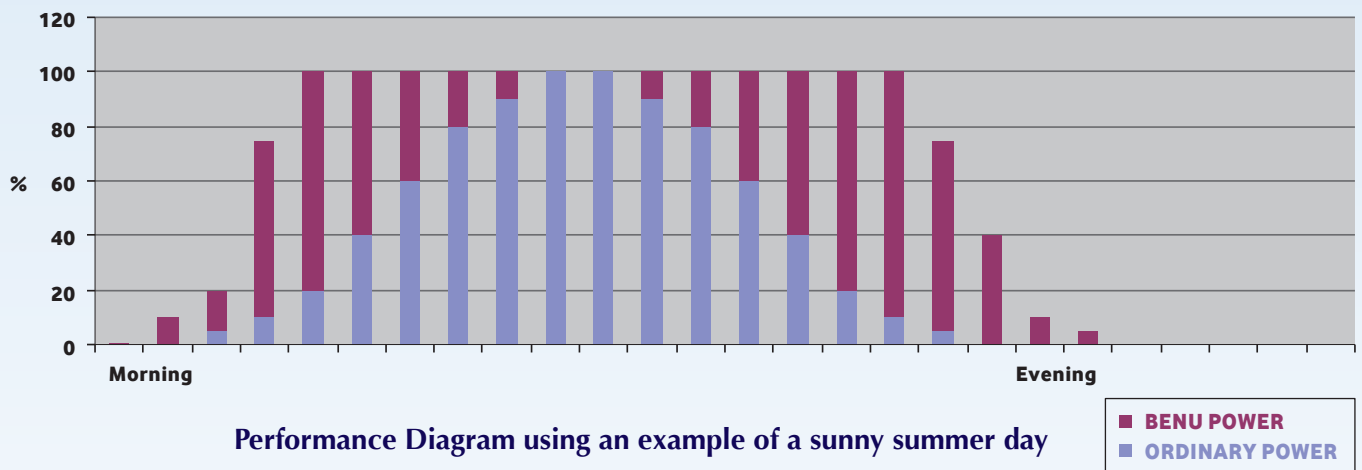

The Sun is the major source of life and energy on Our Planet Earth, and Solar energy is our earth's primary source of renewable energy. It provides Energy throughout 365 Days a year without fail and its free.

The Sun provides approximately 1,368 W/m² on or near Earth. Sunlight on the surface of Earth is attenuated by Earth's atmosphere, so that less power arrives at the surface closer to 1,000 W/m² in clear conditions when the Sun is near the zenith. Sunlight at the top of Earth's atmosphere is composed of about 50% infrared light, 40% visible light, and 10% ultraviolet light.

In India due to monsoon & weather conditions we approximately get 300 days a year. To use the Max. of it, we again look at Mother Nature, various Plants like sunflower changes their orientation according to position of sun throughout the day.

This technique starts working earlier than flat mounting solar panel and ends late in evening. This way the efficiency of the system increases by about 40%

You work for satisfaction
Let the sun work for your company

**While using solar energy, the main problem is of space,
Let's work together.**

In this competitive world, we go for value for money.
While thinking of cost cutting, we always keep power
bills aside.

Which go on increasing every year.

While you work hard in your company under the roof.
Let, us work above the ideal roof of your company.

To add some more RUPEES in your pocket.

As everyone already knows the Sun is
major source of energy and roof of
the factory is ideal for years.

Let's use it for Solar Power Generation
through Pv cell.

300 days a year gives us 2100 hrs.
of solar power generation.

**For a system of just 100 KVA you may save more than ₹ 4 lacs first year.
Per Year and for more then 10 years .
Absolute zero investments. No increment in tariff every year.**

**Your roof top is not a waste anymore
Use it to add in your savings.**
